

## Corner Protector/Protective Sleeve

### Model YCP & YPS

#### ● CORNER PROTECTORS, MODEL YCP

Corner Protectors are used in conjunction with ratchet straps to protect the edges of loads from banding damage and also to protect the strapping from sharp edges and abrasion. They are suitable for webbing width from 35mm to 100mm.

## Corner Protector/Protective Sleeve

### Model YCP & YPS

Polyester web slings have a tendency to get damaged, abraded or cut when tension between the sling and the load(having rough/sharp surface) develops. To prevent any accidents, it is of up most importance to provide sufficient padding to the edges and abrasive surfaces.

The main purpose to use Protective Sleeves is to increase the life of the sling. They protect the sling from the sharp edges or rough surfaces to which they are exposed at the time of use. Anti Cut Sleeves protect the slings from almost anything. These sleeves are ideal for lifting products with ultra sharp edges such as Steel coils, Glass sheets etc.

									
Model	Material	For Webbing Width	Angle	Dimensions in mm					
				A	B	C	D	E	F
YCP01	PE	50mm	90°	135	135	3	65
